

Summary

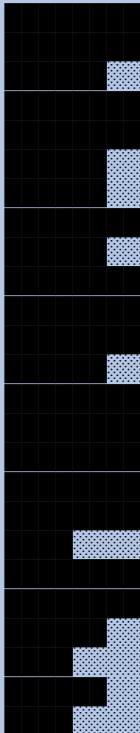

Data & Platform Engineer focused on building scalable, real-time data systems and cloud-native infrastructure.

Experienced in designing and operating high-throughput pipelines using Kafka, BigQuery, and Kubernetes, with a strong emphasis on performance, reliability, and cost efficiency. Built and maintained streaming and batch architectures (Kafka, Flink, Debezium) powering near real-time applications and analytics.

Strong platform engineering background across repository architecture, build systems, CI/CD pipelines, and infrastructure automation. Owns systems end-to-end from ingestion and transformation to deployment.

Skills

- Python
- SQL (BQ, MySQL)
- SQL Server
- Apache Kafka
- Kafka Connect
- Debezium (CDC)
- Apache Flink
- ETL / ELT
- Real-time & batch
- GCP
- BigQuery
- Cloud Run / Functions
- Kubernetes (GKE)
- Docker
- Data modeling
- MySQL
- Redis
- CI/CD
- Pants (custom)
- Git
- Automation
- Datadog
- OpenTelemetry
- Bash
- Java

Work History

Data / DevOps Engineer
Shopkick / TraxRetail

05/2023 to 04/2026
Remote - Bogotá

- Built real-time streaming systems with Kafka and Kafka Connect.
- Developed pipelines between Kafka, BigQuery, and MySQL.
- Created Flink jobs for near real-time data processing.
- Improved pipelines using Cloud Functions, Cloud Run, and Kubernetes.
- Managed data lifecycle from ingestion to analytics in BigQuery.
- Handled schema evolution and migrations with Alembic.
- Maintained repos using Pants and custom CI/CD workflows.
- Built transformations in DataForm for analytics.
- Improved monitoring using DataDog and OpenTelemetry.
- Supported deployments, containers, and system reliability.

Data Engineer
PAHO

(Contractor)
Remote - Bogotá

- Built ETL pipelines for multi-source ingestion using Python and SQL.
- Added data validation, logging, and quality checks.
- Automated data extraction from PDFs and web platforms (OCR + browser tools).
- Optimized SQL transformations for large datasets.
- Worked with teams to deliver reliable data workflows.

Data Engineer
Aptuno

02/2022 to 05/2023
Hybrid - Bogotá

- Built CI/CD-based web scraping pipelines (Python, Selenium, Scrapy, APIs).
- Designed data infrastructure in BigQuery and Datastore.
- Developed microservices with Cloud Run, Flask, and Twilio.
- Implemented chatbot systems using Dialogflow.
- Built dashboards in Power BI and Tableau.

Process Consultant
APET

04/2021 to 07/2022
Hybrid - Bogotá

- Automated workflows using Python and Bash.
- Built alerting and data delivery systems with Slack APIs.
- Designed monitoring systems for operations.

Consulting Analyst
Inventta

12/2020 to 03/2021
Remote - Bogotá

- Supported data analysis and reporting using Python and spreadsheets.

Languages

- Spanish (Native)
- English (Native)
- Portuguese (Professional)
- Russian (Basic)

Education

Electronic Engineering Universidad de Los Andes GPA: 3.85 / 5	01/2016 to 12/2020 Bogotá, Colombia
---	--

Computer Vision Polytechnic University of Saint Petersburg	08/2019 to 02/2020 Saint Petersburg, Russia
---	--

Electronic Engineering DeVry University	10/2014 to 05/2015 Houston, United States
--	--

Professional Training & Certifications

- Building Cloud Computing Solutions at Scale
- Python, Bash and SQL for Data Engineering
- Google IT Automation
- Business English Communication Skills
